Higher collections.

Fewer missing or incomplete charts.
Fewer documentation and coding errors.

Faster, more accurate coding.

Codes charts in seconds.
Lowers audit risk.
Transmits charts instantly so users can process bills immediately.

Less physician paperwork.

Completes templates faster than most other documentation methods, allowing more time to spend with patients.

Instant chart filing, retrieval, and faxing.

Authorized users can retrieve charts, coding information, and management reports from any computer — and send them at any time, anywhere.

No start-up costs.

CAREcoding.com users need only a PC and a scanner.

Low operating costs.

Eliminates data entry, photocopying, faxing, overnight shipping, manual file storage and retrieval, coding, and chart logging and reconciliation.
Reduces charting and coding costs by up to 80%.

More productive workflow.

Users can customize to their workflow and systems needs.
Coders can route problem charts with comments to supervisors for review.
Charts are accessible 24 hours a day from any computer.

Productivity and profitability reports.

Customizable, real-time management reports.
Users can monitor the status of unbilled charts, chart processing time, and coder productivity.

Leverage existing systems.

Leverages existing HIS and billing software.
The links preserve the integrity of your systems.

No more technology headaches.

CARE provides 24 x 7 support, on-site assistance and training.
