

Remote Coding Services

Compared with traditional on-site HIM outsourcing, remote technology can be more effective, and less costly in helping you accomplish your HIM goals. **Care Communications, Inc. offers the most efficient and compliant remote coding tool available.**

Flexible Versatile Custom Quality

- Reduce overhead
- Overcome space limitations
- Eliminate travel, hotel and per diem costs
- HIPAA Ready

**We can
provide quality
reviews for all
of our remote
services**

Direct Access (remote access to clinical data)

CARE has been the leader in providing remote coding services for the past 15 years. Our experienced coders are familiar with a wide range of clinical systems, encoders and abstracting systems. We have achieved great success with our highly wired clients by directly accessing their on-line clinical data to deliver our coding services. Confidentiality is never compromised and **CARE** coders abide by your remote access, confidentiality and privacy regulations.

Bonded Mail Carrier

Copy your records and send to **CARE** using **bonded carrier**. This is one of the original methods of providing remote coding support and is still being used by facilities.

Dedicated High Speed Faxing

Use **CARE's secure** high-speed fax equipment to fax records to **CARE** for coding and or Quality Assurance projects. Equipment has security functions allowing it to dial selected sites only. Discover rapid turn around times

CAREcoding.com

Experience the ease of web-based technology to complete your Coding, Abstracting, and Data-Entry needs, with built in quality assurance functions.

Records are scanned, **encrypted** and sent to a highly secure, off-site facility. Authorized remote-users access records, code, and enter data into your Information System. **CARE's** experienced Information System professionals will implement the most efficient strategies to achieve optimal results.
